Professional Summary

Motivated BCA student with solid foundation in Node.js, Express.js, and MongoDB. I am enthusiastic about leveraging technology to build scalable web applications that solve real-world problems. Demonstrated ability to learn modern technologies quickly and apply them through hands-on projects. Seeking internship or entry-level opportunities to contribute technical skills while gaining industry experience in software development.

Education

DAV Centenary College **August 2023 – June 2026 (Expected)**

Bachelor of Computer Applications (BCA) *Delhi, India*

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Web Technologies.
- Academic Projects: Developed multiple GUI applications and Full Stack Web Developments using modern frameworks.

Technical Skills

Programming Languages: JavaScript, SQL, HTML, CSS, Python
Backend Development: Node.js, Express.js
Database Technologies: MongoDB
Frontend Technologies: React.js, Responsive Web Design, DOM Manipulation, Async JavaScript
Developer Tools: Git, GitHub, VS Code, Command Line
Core Concepts: Data Structures, Problem Solving, Debugging

Academic & Personal Projects

Service Hub – Local Service Booking Web Application | React.js, Node.js, Express.js, MongoDB **2026**

- Developed a full-stack service booking platform connecting users with local service providers such as electricians, plumbers, and cleaners.
- Implemented user and provider authentication system with secure login and registration using JWT.
- Designed RESTful APIs using Express.js to manage users, services, and booking operations.
- Integrated MongoDB database for storing user profiles, provider details, and service data.
- Built a responsive frontend using React.js with dynamic components and state management.
- Added profile avatar generation showing the first letter of the user's name after login or registration.
- Implemented service browsing interface with icons and category-based service selection.
- Implemented **Axios for API communication** between frontend and backend.
- Used **React Router for navigation and protected routes.**

Personal Portfolio Website | *HTML, CSS, JavaScript, Node.js* **2025**

- Developed a fully responsive personal portfolio highlighting projects and technical skills.
- Implemented modern CSS techniques including Flexbox, Grid, and animations for enhanced UX.
- Integrated contact form with Node.js backend for email notifications and form validation

Technologies: HTML, CSS, JavaScript, Open Weather API **2025**

- Built a Weather Forecast Web App using HTML, CSS, and JavaScript.
- Integrated Open Weather API to fetch and display real-time weather data.
- Implemented dynamic UI updates, weather icons, and error handling for better user experience.

Additional Experience

Technical Skills Development **August 2024 – Present**

Self-Learning & Practice *Online Platforms*

- Actively solving coding problems on Leet Code and Hacker Rank to strengthen data structures knowledge
- Completed online courses in Node.js, MongoDB, and full-stack development through Udemy and Free Code Camp
- Building personal projects to apply theoretical knowledge and develop practical programming skills.
- Participating in college coding competitions and technical workshops to enhance problem-solving abilities

Achievements & Activities

Problem Solving: Solved coding problems across multiple platforms
Academic Performance: Maintaining strong academic record with focus on computer science fundamental

College Activities: Active member of college coding club and technical society.
Continuous Learning: Regularly updating skills through online courses, documentation, and tech blogs.
